

MARYAM JAVAID

AI Automation Engineer

maryamjavaidbcs164@gmail.com | [LinkedIn](#) | [GitHub](#) | [Behance](#) | [Portfolio](#)

AI Automation Engineer with hands-on experience building end-to-end automation systems — live lead-generation pipelines, AI outreach agents, and website/competitor intelligence tools. Comfortable across the full stack of an automation build: workflow orchestration (n8n), LLM integration and prompt engineering, API design, and frontend development (Next.js/TypeScript). Currently building AI agents professionally as an AI Fluency Intern at FlyRank AI.

EXPERIENCE

AI Fluency Intern — FlyRank AI

2026 – Present

- Design and build AI automation workflows and agents for real business use cases, spanning lead generation, brand monitoring, and outreach automation.
- Work across the automation stack: n8n workflow orchestration, LLM API integration (OpenRouter, Google Gemini), and structured prompt engineering for agent reliability.
- Own projects end-to-end — from architecture and build through testing, documentation, and stakeholder-facing writeups.

PROJECTS

Automated Lead Qualification & Outreach System | *n8n, OpenRouter API, Airtable, Gmail API*

- Built a full lead-generation pipeline:** form webhook intake → data enrichment → JavaScript processing → LLM-based lead scoring → automatic logging to Airtable → routed, AI-personalized outreach via Gmail.
- Impact:** replaced manual lead triage with an automated scoring and routing system, cutting response time on qualified leads.

GrowthPilot AI — Website Intelligence & Competitor Analysis Tool (In Development) | *Next.js 14, TypeScript, Tailwind CSS, Framer Motion*

- Designing a tool that analyzes a company's website and auto-generates structured business intelligence:** SWOT analysis, competitor positioning, and go-to-market sales strategy.
- Scoping AI-personalized outreach generation** as part of the report pipeline, turning raw website data into ready-to-send sales messaging.
- Built the full frontend:** a polished, animated Next.js/TypeScript interface with a component-driven design system.

Brand Reputation Monitoring Agent | *n8n, Google Gemini, NewsAPI, Google Sheets, Slack*

- Built an autonomous, scheduled AI agent (Agent node with memory) that pulls brand mentions from live news sources,** scores sentiment, logs results to Google Sheets, and pushes real-time Slack alerts on negative coverage.

RAG-Based Research Assistant | *Python, Claude API, Vector Retrieval, PDF Processing*

- Co-built a retrieval-augmented generation system with a research partner:** PDF ingestion → semantic retrieval → citation-grounded answer generation, aimed at reducing LLM hallucination in research Q&A.

TECHNICAL SKILLS

- Programming:** Python, SQL, HTML/CSS, TypeScript
- AI & Automation:** n8n, LLM/Agent Design, Prompt Engineering, RAG, OpenAI/OpenRouter/Gemini/Claude APIs, Webhooks
- Web & Tools:** Next.js, React, Tailwind CSS, Git/GitHub, Postman, Airtable, Google Sheets, Slack API
- Design:** Canva, Infographic & Presentation Design, Visual Content Creation

EDUCATION

Bachelor of Science, Computer Science

COMSATS University Islamabad, Wah Campus | Expected Graduation: 2028
